Saratoga Spa & PSP Fabricating Partnership

Saratoga Spa is pleased to announce a new partnership with PSP Fabricating Inc. as the supplier of our spa covers.

PSP Fabricating, founded in 1998, specializes in hot tub covers, safety covers, and solar blankets. Located in a state-of-the-art manufacturing facility in Barrie, Ontario, Canada, we are impressed by their advanced production capabilities and exceptional customer service.

What This Means for Our Spa Covers:

- Higher-quality materials
- Standard 5" to 3" taper for improved water runoff
- Enhanced foam density for better insulation and durability
- Standard 3-Year Limited Warranty on all PSP-manufactured covers

Collaboration for a Better Fit

PSP Fabricating has worked closely with Saratoga Spa for more than six months to fine-tune all spa cover dimensions, resulting in a cleaner, more precise fit across our product line.

Transition Details

The transition to PSP-manufactured covers will begin soon. During this period, new spa orders will be fulfilled with a PSP Fabricating spa cover. Aftermarket cover orders will be fulfilled with a spa cover manufactured by CORE until that inventory is exhausted.

More details will follow as we move forward through this transition. Thank you for your continued partnership and commitment to Saratoga Spa.
