

SARBP20X Tech Sheet

Customer:	Saratoga Spas
Part Number:	59559-01 Titanium 4.0kW
Custom Box Overlay	<input type="checkbox"/>
Box Overlay Part Number	N/A
UL System Model:	BP20-SARBP20X-AS
Software Version ID:	M100_220 V71.0
Software Version:	71.0
File Name:	BP2000_71.0_SARBP20X_2023.hex
Configuration Signature:	B59FEB32
Eng. Project Number:	5793
Control Panels:	
spaTouch™ 3	Any version
TP700	Any version

Manufactured under one or more of these patents. U.S. Patents: 5332944, 5361215, 5550753, 5559720, 5,883,459, 6253227, 6282370, 6590188, 6976052, 6965815, 7030343, 7,417,834 b2, Canadian Patent: 2342614, Australian patent: 2373248 other patents both foreign and domestic applied for and pending. © Copyright 2009 Balboa Water Group.

System Revision History

Part #	EPN	Date	Originator	Changes Made
ZT000553	5334	11-15-21	Customer	BP2000-based system with custom Setups, and with spaTouch™ 3 and TP700 as the only panels expected to be used.
59559	5334	01-11-22	Customer	Approved for production.
ZT-59559-01	5793	06-27-23	Customer	Add 106F Overage. Add DIP switch to select circ type. Update software to not turn Off Light 1 when in Hold.
59559-01	5793	07-10-23	Customer	Approved for production, and software updated to release version.

bba™ 2 / bba™ 3 (Balboa Bluetooth Amp) connection is documented separately.

bba™ 2 / bba™ 3 is integrated into graphic display panels (including TP700 and spaTouch™).

Basic Functions Setup 1-8

Power Requirements:

240VAC, 50/60Hz*, 48A, Class A GFCI-protected service (Circuit Breaker = 60A max.),
4 wires [hot, hot, neutral, ground]

* BP systems automatically detect 50Hz vs 60Hz. However, power frequency (50Hz vs 60Hz) is just one of many differences between North American (UL) and CE power, and it is because of these other differences that different BP systems must be used for UL vs CE territories. Also, there are a few countries that use CE power but 60 Hz (such as South Korea) which need CE systems, and a few countries that use UL power but 50 Hz which need UL systems.

HiPot Testing Note:

Disconnect slip terminal with green wires from J6 prior to performing HiPot test. Failure to disconnect may cause a false failure of the test. Reconnect terminal to J6 after successful completion of HiPot test.

Basic Functions Setup 1-8

System Outputs:

Pump 1	240VAC	2-Speed	12A max	15-minute timer for High Speed, 15-Minute timer for Low Speed This is the heater pump in Setups 6–8 Must deliver 20 GPM through heater
Pump 2	240VAC	2-Speed 1-Speed in Setups 4, 7 Unused in Setups 5, 6, 8	12A max	15-minute timer
Pump 3	240VAC	2-Speed 1-Speed in Setup 2 Unused in Setups 3–8	12A max	15-minute timer
Blower	240VAC	1 Speed Unused in Setups 1–5, 7, 8	4A max	15-minute timer
Circ Pump	120VAC**	1-Speed	2A max	24-hour with 3°F shutoff (outside of filter cycles) <u>or</u> Programmable Filtration Cycles + Polling This is the heater pump in Setups 1–5 Must deliver 20 GPM through heater
Ozone	120VAC**		.5A max	Slaved to Circ Pump in Setups 1–5 Independent in Setups 6–8
Spa Light	10VAC	On/Off	2A* max	240-minute timer.
A/V (Stereo)	120VAC	Hot	4A max	Always on
Heater	4.0kW @ 240VAC max			

**Both the Circ pump and Ozone can be converted to 240V, however they will be the same voltage after conversion. (Both 120V or both 240V.)

* 2A max limit is shared by On/Off Spa Light and CHROMAZON[™].

1	Yes*	2-Speed	2-Speed	2-Speed	None	°F
2	Yes*	2-Speed	2-Speed	1-Speed	None	°F
3	Yes*	2-Speed	2-Speed	None	None	°F
4	Yes*	2-Speed	1-Speed	None	None	°F
5	Yes*	2-Speed	None	None	None	°F
6	None	2-Speed	None	None	1-Speed	°F
7	None	2-Speed	1-Speed	None	None	°F
8	None	2-Speed	None	None	None	°F

* Circ type is either 24hr/3°F or Programmable Filters + Polling, depending on the setting of DIP switch A8.

System (and any replacement board) **is shipped in Setup 3**

Changing Software Setups with spaTouch™ Icon-Driven Panels

Test Menu Access (S1, Switch 1 ON) *Service Technician ONLY.*

DANGER! HIGH VOLTAGE WILL BE ACCESSIBLE! SERVICE TECHNICIAN ONLY!

While the system is running, move DIP Switch 1 (on S1 on the Main circuit board) to ON.

The system will enter Test Mode.

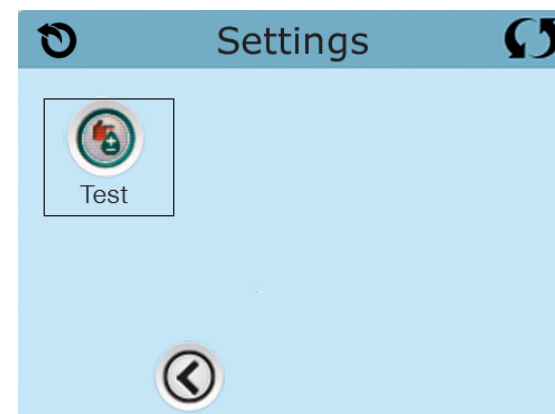

Moving DIP Switch 1 to OFF will exit Test Mode.

To Change Software Setups:

While in Test Mode, press the indicated icons to move from screen to screen.

The example screens shown here are from the spaTouch 1 Icon-Driven Panel, but the screens on the spaTouch 2 Panel are similar. The main difference is that the spaTouch 2 display is wider.

Once on the Setup Selection screen, press the Up or Down icon to select the desired Setup Number, then press the Check Mark icon to confirm and to have the spa restart.

After the system restarts, you may see a message that "The settings have been reset"; this is normal after changing Setups with DIP Switch 6 in the OFF position. Press "Clear" to dismiss this message.

Equipment Expansion

Expansion Features

Control Connection	Default	Fuse
Relay 1 (J101)	Undefined	None
Relay 7/8 (J107)	See Below	30A
	2-Speed Pump 2 in Setups 1, 2, 3	
	1-Speed Pump 2 in Setup 4, 7	
	Unused in Setups 5, 6, 8	
Relay 9/10 (J108)	Undefined	None

DIP Switch Functions

Fixed-function DIP Switches

- | | |
|----|--|
| A1 | Test Mode (normally Off). |
| A2 | In "ON" position, add one high-speed pump (or blower) with Heater. |
| A3 | In "ON" position, add two high-speed pumps (or 1 HS Pump and Blower) with Heater. |
| A4 | In "ON" position, add four high-speed pumps (or 3 HS Pumps and Blower) with Heater. |
| A5 | In "ON" position, enables Special Amperage Rule B. See Special Features section under Configuration Options for functionality with your system.
In "OFF" position, enables Special Amperage Rule A. |
| A6 | Persistent memory reset (Used when the spa is powering up to restore factory settings as determined by software configuration). |

A2, A3, and A4 work in combination to determine the number of high-speed devices and blowers that can run before the heat is disabled. i.e. A2 and A3 in the ON position and A4 in the OFF position will allow the heater to operate with up to 3 high-speed pumps (or two HS Pumps and Blower) running at the same time. Heat is disabled when the fourth high-speed pump or blower is turned on.

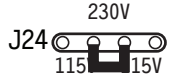

Note: A2/A3/A4 all off = No heat with any high-speed pump or blower.

Assignable DIP Switches

- | | |
|----|--|
| A7 | In "ON" position, enables a 5-minute cooldown for some gas heaters (Cooling Time B).
In "OFF" position, enables a 1-minute cooldown for electric heaters (Cooling Time A). |
| A8 | In "ON" position, Circ Type is Programmable Filters + Polling (aka Acts Like Pump 1 Low)
In "OFF" position, Circ Type is as configured under General Features (see page 13) |

Undesignated switches are not assigned a function.

Jumper Definitions

J109	GFCI Test/Trip Enable/Disable Note: This feature must be enabled in software as well.	J109 
J91	Real Time Clock Enable/Disable Note: This Jumper should NOT be shorted when the Control Panel can display time of day.	J91 
J30	Do Not Use	
J31	Non Applicable on UL models (Used on CE models only)	J31 
J29	Heater Disable Switch Connection. If J29 is shorted by any means, the heater will not run until J29 is no longer shorted. If J29 is shorted during power-up “J29” will appear on the panel. The message can be dismissed with a button press, and is the only control panel notification of J29 being shorted. No message is displayed if J29 is shorted after power-up, but the heater will not run until J29 is no longer shorted. J29 expects a switch closure (not a voltage) as the command signal. In some areas, a local power company may offer discounts based on voluntary “power shedding” devices that may be installed in conjunction with the spa.	J29 
J25, J26, J27	Heater Type Settings. Note: Factory Configured do not change.	J25  J26  J27 
J24	Jumper on center two pins (230V) when heater is running at 240V. Two Jumpers installed; one on left 2 pins and one on right 2 pins (115V) when heater is running at 120V.	J24 

Warning!

Setting DIP switches or jumpers incorrectly may cause abnormal system behavior and/or damage to system components.
Refer to Switchbank illustration on Wiring Configuration page for correct settings for this system.
Contact Balboa if you require additional configuration pages added to this tech sheet.

Manufactured under one or more of these patents.
