

SARATOGA SPA TECHNICAL BULLETIN

Balboa Pack and Topside Announcement

Saratoga Spa will be switching our spa packs and topsides in our spa models. We will be moving from Waterway to Balboa. We have maintained a long-time relationship with Balboa and are excited to bring them back into our Domestic Product Line offering.

We will be utilizing one pack and one topside that allows our Dealer base to have limited Sku's with the product. We will be using a Saratoga Customized Balboa BP pack and their square TP740T topside.

We know with change there are new things to learn, but we worked hard to keep the transition as seamless as possible.

We have attached the TP740T Topside manual and the BP pack manual to review.

We will begin producing the Luxury Product line with Balboa beginning production May 1st. Currently the Polo is not able to be configured with the Balboa System.

We will begin producing Special Edition, Limited Edition and Cottage Series beginning July 1st.

Saratoga Spa is excited to offer this opportunity going forward as Balboa Water Group has continued to invest in their pack and topside development.
