

SARATOGA SPA TECHNICAL BULLETIN

Balboa Pack and Toppide Announcement

Saratoga Spa announced in May 2024 that we would begin the transition to Balboa Toppide and Pack systems. We are now announcing that as of January 1, 2025, new spas being ordered, along with 2025 Quick Ship spas, will be built with the Balboa TP740T Toppide and Balboa Saratoga Spa Configured spa pack. We have attached the TP740T Toppide manual and the BP pack manual for your review.

We will be starting 2025 spa production in the week of January 6, 2025. All eligible spa orders received as of January 6th will be built with Balboa Systems.

Note: The following spas are currently not available with Balboa systems: Geyser Series, B15Spa and Polo.

Saratoga Spa will keep the same design concepts using Balboa as was featured with Waterway. The standard Saratoga Spa build will use one style of topside control, and one style of Saratoga Spa configured pack. This will limit the inventory sku's for Saratoga and Saratoga Dealers.

We have been building Balboa Systems since Spring 2024 and many of you are already familiar. With change there are new things to learn so are working hard to keep the transition as seamless as possible.

Saratoga Spa has maintained a long-time relationship with the Balboa Water Group, and we are excited about this new opportunity to offer Saratoga Dealers a new level of continued product advancement.
